

EDUCATION

Washington University, St. Louis - James McKelvy School of Engineering May 2028
Computer Science and Mathematics, Bachelor of Science | Finance, Minor
Langsdorf Fellowship - 4 year Full-Tuition Merit Scholarship | McKelvey Undergraduate Research Award | NCAA
Division III Women's Soccer National Champion 2024 & 2025

TECHNICAL SKILLS

Python, Java, C#, C++, SQL, Git, JavaScript, REACT Native, HTML, Swift, SwiftUI, pandas, NumPy, PyTorch, R, .NET Core, Node.js, Agile, Docker, PowerShell, Bash, Scrum, JIRA, VSTS, REST API, Salesforce, Office 365, Azure Cloud, SwaggerHub, Postman, OOP, HuggingFace, Web Development, Data Structures & Algorithms, User Interface Design

EXPERIENCE

Ryder Systems, Inc – Fortune 500, Transportation & Logistics *June 2025 – Sept. 2025*
Application Developer/Machine Learning Intern

- Migrated critical pricing grid from legacy JavaScript to .NET Core within a large-scale enterprise application, directly impacting pricing accuracy and business-wide cost calculations
- Integrated an NLP – driven vector search feature into a production search interface, using machine learning to expand searchable criteria, enabling more flexible and accurate queries

NOAA - S.E. Fisheries Science Center - U.S. Dept. of Commerce *Aug. 2023 - June 2024*
Application Developer Intern

- Supported enterprise applications: mapped data flows, benchmarked data retention schedules, verified disaster recovery plans, and created shrimp boat tracking enterprise application
- Built and deployed an enterprise contacts application for 4,200+ employees using Oracle APEX and SQL, improving internal access to personnel data

PortMiami - Planning and Environmental Resiliency Department *July 2023 - Aug. 2023*
Data and Sustainability Intern

- Developed the vessel shore power plan, analyzing electrical load data using SQL and Excel to prevent grid stress
- Performed comparative lifecycle and ROI analysis on electric vs. gas top-loading equipment
- Developed data-driven grant application materials by integrating emissions, operational, and spatial data

PROJECTS AND COMPETITIONS

Ryder Systems Intern Hackathon – 1st Place Winner *Aug. 2025*

- Built a full-stack customer document portal in 3 days, enabling secure, request-based file uploads from customers to designated branches. Implemented Okta authentication w/ role-based access control, integrated Firebase storage with malware scanning, and developed the Node.js/React.js application to streamline admin review and delivery

Ignis App *Nov. 2022 - 2024*

- Developed AI-driven wildfire safety mobile application with integrated APIs. Ignis enables multi-house monitoring and provides advanced warning surpassing national evacuation orders
- Coded user interface and back-end, structured databases, created fire prediction algorithm, integrated NASA data using API, and wrote authentication scripts

Florida 27th District Congressional App Challenge - 1st Place Winner *Dec. 2023*

Miami-Dade County Silver Knight Honorable Mention Award (Vocational Technical) *Dec. 2023*

- Outstanding service and academic recognition

LANGUAGES

- English – Fluent | Spanish – Advanced proficiency
